

BioLogic

The BioLogic by betterair is the first device of its kind that provides a safe and natural solution for treatment of pathogens, allergens and viruses found on surfaces, objects and the air in our indoors by dispersal of environmental probiotics: Enviro-Biotics®.

The BioLogic device nourishes our indoor spaces where we spend most of our time by continuous dispersal of beneficial bacteria and thereby creates a protective layer which supports the health and well-being of our indoors where we spend over 90% of our time

- Ecological re-balance of our indoors by natural environmental probiotics
- For safe use in our homes, offices, vehicles, and other enclosed spaces
- Continuous and automatic protection on surfaces, objects and air
- Coverage of up to 50 sqm
- Up to two weeks operation between charges
- Full control via mobile phone application
- Compact design, portable, silent and energy saving

Enviro-Biotics® have passed comprehensive tests by international laboratories and have been approved as effective and safe for use. Furthermore, it is safe for humans and animals, does not leave marks or damages electric appliances and surfaces.

Technical data:

Height: 18.50 cm

Width: 7 cm

Weight: 400 grams (with a full bottle)

Voltage: 5vDC

Battery: 2000 mAH

Charge: USB – C Type

Capacity of the bottle: 75 ml

Significant reduction of:

- Viruses (including COVID-19)
- Mold
- Pathogens
- Dust mite allergens
- Pet allergens
- Other allergens
- Unpleasant odors

Manufactured in Israel

The company has been developing products since 2014

100% Israeli research and development with the participation of globally renowned scientists and researchers.

All the products are available for international marketing for several years

Marketed to more than 25 countries worldwide
